PREFACE TO 2006 AHQ

This Annual Hospital Questionnaire (AHQ) is being administered under the authority of the Illinois Health Facilities Planning Act [20 ILCS 3960/]. The accuracy of the emails (AHQ sent electronically to the hospitals), is tested prior to the original submittal of the survey. 2006 questionnaire is compiled and pilot tested by seven hospitals. Their comments and suggestions were taken into consideration. On March 7th, 2007 AHQ was distributed electronically all 214 hospitals and was given 6 full weeks to complete the questionnaire. The CEO of the facility reviewed and signed the document and the signature page was sent to IDPH (only the signed letter, no copies accepted. April 23rd was the original due date, and an extension was granted to all hospitals until May 4th.

Differences from Previous AHQs to 2006 AHQ

This year survey has 2 units Part I, the utilization of the medical service units and Part II, the financial information of the facility. **Part I is collected based on the calendar year, where as the financial Part II is based on the individual facility's fiscal year.** Financial data were requested to be derived from their respective most recent audited financial statements.

The survey tool has been modified to relate to the on-going advancements in the medical field. There was a major change in the way Cardiac surgery data was collected. We have introduced "Cardiac surgery" term and in depth Cardiac catheterization definitions. Cardiac Cath labs have been categorized by their physical set up and their utilization just as any other category of service (like Medical surgical, ICU etc).

Validation and Compilation of 2006 AHQ data

The submitted online survey data from each individual facility is received by the IDPH server and is exported into the database. The key fields that are being validated when the survey is submitted are as follows:

- Peak bed set up and staffed exceeding the (Authorized bed) CON limit.
- Quality checks on the occupancy rate and payor source parameters.
- Average length of stay (ALOS) and Average daily census (ADC) exceeding 100% capacity.
- Race-ethnic data matching the utilization admission and patient days.
- Outpatient and Inpatient surgical time per case tested to the state average.
- Number of patients listed under payor source category (inclusive of the charity care) validated to total patients treated.

IDPH staff has made every effort to contact the respective facility to verify the submitted data and an opportunity was given to correct the data and if errors were detected. It has been the responsibility however, of the hospital management, to assure the accuracy and completeness of the data submitted.

At the time of this posting, the financial data collection and data validation is not complete. Results of the Part-II will be posted at the later time.
****

* Note: According to project # 06-017, approved on 7/20/2006, IHFPB, issued a permit to Memorial Hospital of Carbondale to construct an addition to the hospital and to add 11 Medical-Surgical beds. As a result, Medical-Surgical beds will increase to 85. Medical-Surgical/Pediatrics beds in Planning Area F-07 now total 362, with an excess of 205 beds.

* Note: According to project # 05-054 approved on 6/7/2006, Sherman received a permit to establish a replacement hospital and discontinue current facility. As a result, Medical-Surgical beds will be reduced from 293 to 189, Pediatric beds will be reduced from 18 to 8, Obstetrics beds will be increased from 24 to 28, and Intensive Care beds will be increased from 28 to 30. The current profile reflects facility's utilization prior to the project approval.

* Note: According to project # 05-034 approved on 11/5/05 the CON total bed count for St. Elizabeth is 108; however, as the project is still in progress and not complete, the peak census and beds set up and staffed are greater than authorized CON beds. Cardiac Catheterization activity within the facility also reflect the same issue.

* Note: According to project # 04-091, Thorek was approved to add 20 AMI beds and reduce 20 Med-surg beds. The project completion (physical availability of beds) is not until late 2007, hence no utilization under AMI is listed. However, the bed count gets into the inventory as soon as the project is approved.
