**CHICAGO** – Unemployment rates in Illinois fell in 12 metro areas, increased in one and remained the same in one. Seven metro areas across the state saw job loss compared to a year ago, according to preliminary data released today by the Illinois Department of Employment Security (IDES) and the U.S. Bureau of Labor Statistics (BLS). Not seasonally adjusted data compares October 2015 with October 2014.

Illinois businesses lost jobs in seven metro areas including the Quad Cities (-2.1 percent, -3,900), Carbondale-Marion (-1.6 percent, -900), and Peoria (-1.0 percent, -1,800). Illinois businesses added jobs in six metros, in which the largest increases were seen in: Danville (+1.7 percent, +500), Elgin (+1.6 percent, +4,200), and Chicago-Naperville-Arlington Heights Metro Division (+1.4 percent or +49,600). The industry sectors recording job growth in the majority of metros were: Retail Trade (nine of 14), Leisure and Hospitality (nine of 14), Transportation, Warehousing and Public Utilities (eight of 14), and Education and Health Services (eight of 14).

“We are thankful for every single job we have gained since the national recovery began in July 2009,” IDES Director Jeff Mays said. “However, at Thanksgiving 2015, too few Illinois residents are feeling this turnaround.”

The not seasonally adjusted Illinois rate was 5.3 percent in October 2015 and stood at 12.2 percent at its peak in this economic cycle in January 2010. Nationally, the not seasonally adjusted unemployment rate was 4.8 percent in October and 10.6 percent in January 2010 at its peak. The unemployment rate identifies those who are out of work and looking for work, and is not tied to collecting unemployment insurance benefits.

**Help Wanted**

Area employers advertised for 5,400 positions in October and approximately 86 percent sought full-time employment, according to Help Wanted OnLine data compiled by the Conference Board. It is a global, independent business membership and research association. Employers actually need more workers than the help wanted advertising indicates because some industries, such as construction, typically do not advertise job openings.

The not seasonally adjusted unemployment rate decreased to 5.6 percent in October 2015 from 5.8 percent in October 2014. The last time the October rate was equal to or lower was in 2008 when it was 5.2 percent. For the month of October 2015, the estimated number of unemployed people in the labor force was 10,800.

Total nonfarm employment decreased -3,900 compared to October 2014. Leisure-Hospitality (+200), Transportation-Warehousing-Utilities (+200), Retail Trade (+100), and Wholesale Trade (+100) reported payroll gains. Professional-Business Services (-2,300), Manufacturing (-800), Government (-700), Educational-Health Services (-500), and Construction (-200) sectors recorded employment declines compared to one year ago.

The unemployment rate identifies those who are out of work and seeking employment. A person who exhausts benefits, or is ineligible, still will be reflected in the unemployment rate if they actively seek work.

**Note:**

- Monthly 2014 unemployment rates and total non-farm jobs for Illinois metro areas were revised in February 2015, as required by the U.S. Dept. of Labor, Bureau of Labor Statistics (BLS). Comments and tables distributed for prior metro area news releases should be discarded as any records or historical analysis previously cited may no longer be valid.
