CHICAGO—Eight of Illinois’ 14 metropolitan (metro) areas experienced decreases in their over-the-year unemployment rate and eight of the metro areas had increases in nonfarm jobs, according to preliminary data released today by the U.S. Bureau of Labor Statistics (BLS) and the Illinois Department of Employment Security (IDES).

“One metropolitan area losing jobs is one too many,” said IDES Director Jeff Mays. “While we boost our efforts to help employers connect with qualified candidates, we also need effective policies in place to realize robust job growth in Illinois.”

Illinois businesses added jobs in eight metro areas, in which the largest increases were seen in: Lake-Kenosha (+2.4 percent, +10,000), Rockford (+2.0 percent, +3,100), and Springfield (+1.8 percent, +2,000). Total nonfarm jobs in the Chicago-Naperville-Arlington Heights Metro Division increased (+1.2 percent or +43,700). Illinois businesses lost jobs in six metro areas including the Quad Cities (-2.9 percent, -5,500), Bloomington (-1.6 percent, -1,500), and Peoria (-1.3 percent, -2,400). The industry sectors recording job growth in the majority of metro areas were:

Education and Health Services (11 of 14), Leisure and Hospitality (11 of 14), Retail Trade (10 of 14), and Professional and Business Services (nine of 14).

Not seasonally adjusted data compares June 2016 with June 2015. The not seasonally adjusted Illinois rate was 6.0 percent in June 2016 and stood at 12.2 percent at its peak in this economic cycle in January 2010. Nationally, the not seasonally adjusted unemployment rate was 5.1 percent in June 2016 and 10.6 percent in January 2010 at its peak. The unemployment rate identifies those who are out of work and looking for work, and is not tied to collecting unemployment insurance benefits.

Help Wanted

Area employers advertised for 4,400 positions in June and approximately 83 percent sought full-time employment, according to Help Wanted OnLine data compiled by the Conference Board, which is a global, independent business membership and research association. Employers actually need more workers than the help wanted advertising indicates because some industries, such as Construction, typically do not post advertised job openings. Employment opportunities were available in Transportation, Health Care, Sales, and Office Support Occupations in the summer of 2016. Job openings were also advertised for Education, Computer, and Management occupations. Installation, Maintenance, and Repair workers were also in demand. Many jobs were advertised in Food Service, Engineering, Construction, and Production occupations. Jobs were available for Ground Maintenance workers this summer.

Champaign-Urbana MSA

The not seasonally adjusted unemployment rate declined to 5.3 percent in June 2016 from 5.4 percent in June 2015. In June 2016 there were an estimated 6,200 unemployed in the labor force.

Non-farm employment increased from its year-ago level by +1,200. Retail Trade (+600), Education and Health Services (+600), Government (+500), Transportation, Warehousing, and Utilities (+300), Leisure-Hospitality (+200), and Construction (+200) recorded job gains. Information (-500), Manufacturing (-400), Wholesale Trade (-200), and Professional and Business Services (-100) recorded an employment loss from June 2015.

Danville MSA

The not seasonally adjusted unemployment rate increased to 7.1 percent in June 2016 from 7.0 percent in June 2015. In June 2016 there were an estimated 2,500 unemployed in the labor force.

Non-farm employment increased from its year-ago level by +100. Retail Trade (+100), Transportation, Warehousing, and Utilities (+100), and Construction (+100) recorded job gains. Manufacturing (-200) recorded an employment loss since June 2015.

Note:

- Monthly 2015 unemployment rates and total non-farm jobs for Illinois metro areas were revised in February and March 2016, as required by the U.S. Dept. of Labor, Bureau of Labor Statistics (BLS). Comments and tables distributed for prior metro area news releases should be discarded as any records or historical analysis previously cited may no longer be valid.
