Emergency Justification: The limited control of the BAS system has greatly disrupted normal operating procedures regarding access and movement within the facility, increasing the risk of harm to facility personnel and patient/residents. The BAS system also monitors the building's HVAC system components for operational efficiency, as well as alarm notification of component failures. Failure to restore full control of the BAS system poses serious disruption in critical State services affecting health and safety.

Accordance with Admin Rule: Minimize serious disruption to critical state services that affect health, safety, or collection of substantial state revenues
