Investment Information

Investment Objective & Strategy

The trust seeks the highest level of income consistent with the preservation of capital over time by investing primarily in marketable debt securities. Under normal circumstances, the trust will invest at least 80% of total assets in income-producing securities, which may include, but are not limited to, U.S. government and agency obligations, mortgage- and asset-backed securities, corporate bonds, foreign securities, collateralized mortgage obligations (CMOs), Treasury Inflation Protected Securities (TIPS), and others, including on occasion, equities. The trust focuses primarily on investment grade income securities.

Category Description: Intermediate-Term Bond

Intermediate-term bond funds have average durations that are greater than 3.5 years and less than six years. Most of the funds rotate among a variety of sectors in the bond market, based upon which appear to offer better values. Whatever types of bonds they hold, these funds are less sensitive to interest rates, and therefore less volatile, than funds that have longer durations.
