## Investment Information

### Investment Objective & Strategy

The investment objective of this Fund is to seek long-term growth of capital by investing in a diversified portfolio of reasonably priced, quality international companies with strong fundamentals and/or accelerating earnings growth. The Fund employs a disciplined strategy emphasizing fundamental research, quantitative analysis, portfolio construction and risk management techniques. The "EQV" (Earnings, Quality, Valuation) strategy focuses on identifying quality companies experiencing, or favoring, above average earnings growth not reflect in their valuations. Portfolio research is focused by geographic region. Investment selection uses a bottom-up approach.

### Category Description: Foreign Large Growth

Foreign large-growth portfolios focus on high-priced growth stocks, mainly outside of the United States. Most of these portfolios divide their assets among a dozen or more developed markets, including Japan, Britain, France, and Germany. These portfolios primarily invest in stocks that have market caps in the top 70% of each economically integrated market (such as Europe or Asia ex-Japan). Growth is defined based on fast growth (high growth rates for earnings, sales, book value, and cash flow) and high valuations (high price ratios and low dividend yields). These portfolios typically will have less than 20% of assets invested in U.S. stocks.
