

Rail safety improvements approved for Shelby County

Springfield, IL – On Thursday, the Illinois Commerce Commission (ICC) approved funds to install automatic warning devices and highway approach improvements at the County Road 500 N crossing (AAR/DOT#167858H) near Shelbyville, in Shelby County.

“The ICC is proud to work with communities and railroads across Illinois to make highway-rail crossings safer for motorists and pedestrians,” said **ICC Commissioner Michael T. Carrigan**. “The Grade Crossing Protection Fund helps important projects like the one near Shelbyville come to fruition.”

The total estimated cost of the signal installation and incidental surface modifications is \$689,518. Under the agreement, ICC staff recommended the Grade Crossing Protection Fund (GCPF) cover 95 percent of these costs, not to exceed \$655,042. Union Pacific Railroad Company will pay the remaining 5 percent of warning device and incidental surface modification costs, as well as all future maintenance costs.

The total estimated cost of the highway approach grade improvements is \$193,000—100 percent of which will be funded by the GCPF. Clarksburg Township will be responsible for any future maintenance of the highway approaches.

All required signal work is to be completed within 18 months of the ICC’s order. More information on [Stipulated Agreement 2321](#) can be found in [Docket T25-0074](#).

The ICC encourages all rail crossing users to remain vigilant and adhere to safety regulations in and around crossings.

###

About the Illinois Grade Crossing Protection Fund

In 1955, the State of Illinois passed legislation creating the GCPF. Since then, Illinois has strengthened its commitment to public highway-rail safety by increasing funding toward projects such as the closure and consolidation of existing public crossings, installation of new warning systems, highway approach improvements, upgrades to existing warning devices and interconnection to nearby traffic signals, construction/reconstruction of grade separation structures, and the construction of pedestrian grade separations. The ICC administers the GCPF, which is funded by motor fuel tax money designated for rail safety improvements. The General Assembly appropriates \$42 million annually for the GCPF. About the Illinois Commerce Commission

The Illinois Commerce Commission (ICC) is a quasi-judicial body made up of five Commissioners. Through its Public Utility Program, the Commission oversees the provision of adequate, reliable, efficient, and safe utility services at the least possible cost to Illinois citizens served by electric, natural gas, telecommunications, water, and sewer public utility companies. Through its Transportation

Regulatory Program, the Commission oversees public safety and consumer protection programs with regard to intrastate commercial motor carriers of general freight, household goods movers, relocation towers, safety towers, personal property warehouses, and repossession agencies. The ICC's Rail Safety Program also inspects and regulates the general safety of railroad tracks, facilities, and equipment in the state.
