[www.ienconnect.com/enviro](http://www.ienconnect.com/enviro)

### Who should attend?

- Commercial & Residential Contractors
- Demolition Contractors
- Building Maintenance Providers
- Home Inspectors
- Local Building Code Officials
- Property Managers
- Architects
- Engineers

## Did you know?

- Contractors, owners, operators and possibly local governing bodies can be assessed fines and penalties for failing to meet asbestos regulatory requirements for remodeling or demolition of property.
- A licensed professional must perform lead, radon and asbestos abatement.
- Contractors must meet federal lead requirements and receive approved training when remodeling residential property built before 1978.
- Asbestos regulations vary depending on previous property use, as well as, future property use after the remodeling/demolition.
- According to a U. S. Department of Housing and Urban Development (HUD) survey, 68% of U.S. homes constructed before 1940, 43% built 1940-59, and 8% built from 1960-78 contain lead paint hazards.
- Any work on commercial and public buildings with potential to disturb 3 sq/ft or 3 linear/ft require an asbestos inspection.

United States Environmental Protection Agency

Illinois SBDC at Harper College  
Illinois SBDC at Illinois State University  
Illinois SBDC at Joliet Community College  
Illinois SBDC at Southern Illinois University

# Learn From The Regulatory Experts!

## Lead Hazards

Learn how to address lead-based paint issues when working in residential dwellings and child-care facilities, as well as disclosure requirements for renovators and remodelers working in older homes. New Federal training and certification requirements for persons that disturb lead-based paint will be discussed.

## Asbestos

Learn the impact of asbestos regulations on the construction & demolition industry. Attendees will learn what forms must be filed prior to demolition, what the requirements are for achieving compliance during renovation, general requirements of NESHAP and what building materials are regulated by Illinois EPA.

## Radon

Radon is a radioactive gas that is the leading cause of lung cancer among non-smokers. Effective June 1, 2013, in accordance with the Radon Resistant Construction Act (PA-97-0953) all new residential construction in this State shall include passive radon resistant construction. Come and learn how to correctly install a passive system and meet the requirements that villages and local governments will be requiring. When radon resistant is completed correctly, it can result in a

health benefit and save consumers time and money. Home inspectors may be interested in learning about the licensing requirements for radon professionals, and building inspectors how to inspect radon systems in new and existing homes.

## Disposal of Hazardous/Non-Hazardous Wastes

Do you have questions about the proper and legal disposal and recycling of construction and demolition waste? Useful information that will keep your company in compliance with Illinois law will be presented and your questions will be answered.

## IL OSHA On-site Consultation Program

Is your organization prepared for an OSHA inspection? IL OSHA's On-site Consultation Program offers free and confidential safety and hygiene advice to small and medium sized companies. Attend this informative session to learn how we will help your operation develop and/or improve your safety and health management system, insure compliance with OSHA's required written programs and the standards for general industry and construction and even qualify for a one-year exemption from routine OSHA inspections. The On-site Consultation services are separate from enforcement and do not result in penalties or citations.
