"Through the DCEO-OTI program, our company is on the right track to expanding our international sales efforts. With the introduction of matchmaking services to our marketing platform, it may allow our small domestic business to transition to a very large international business... We were able to do many years work in just a few days due to our high visibility and ability to network with multiple international trade partners in their region... I wouldn't have been able to actualize this unexpected and exciting direction we are headed without the State of Illinois' (I)STEP program."
