PUBLIC SECTOR ENERGY EFFICIENCY INCENTIVES SUMMARY PROGRAM YEAR 2016-2017

This is a summary of energy efficiency incentives available through the Illinois Department of Commerce & Economic Opportunity's ILLINOIS ENERGY NOW program for June 1, 2016 to May 31, 2017. This page is intended as a quick reference only — please confirm exact values on the incentive forms. All incentive Pre-approval Applications are due by April 3, 2017 and Final Applications (and completed projects) are due by May 8, 2017. Check funding availability at www.ilenergynow.org.

Eligibility is limited to public sector projects physically located in the state of Illinois. Project locations for those requesting incentives for electric measures must receive electric delivery services from Ameren Illinois or ComEd. Project locations for those requesting incentives for natural gas measures must receive natural gas delivery service from Ameren Illinois, Nicor Gas, Peoples Gas, or North Shore Gas. Project locations that receive either electric delivery service or gas delivery service (but not both) from a participating utility are only eligible for electric or gas incentives (but not both), determined by which energy type (electric or gas) is provided by the participating utility.
