Medicaid Advisory Committee  
September 21, 2007**

401 South Clinton Street, Chicago, Illinois  
201 South Grand Avenue East, Springfield, Illinois

**Members Present**

Nancy Crossman, DHS  
Jill Fraggos for Susan Hayes Gordon  
Debra Kinsey –DCFS  
Richard Perry, D.D.S.  
John Schlofrock, Barton Mgt.  
Robyn Gabel, IMCHC  
Robert Anselmo, R.Ph.

**Members Absent**

Eli Pick, Chairman  
Pedro A. Poma, M.D.  
Diane Coleman, PCIL  
Kim Mitroka – Christopher Rural Health  
Neil Winston, M.D.  
Myrtis Sullivan, DHS

**HFS Staff**

James Parker  
Bill Dart  
Mike Jones  
Lynne Thomas  
Stephen Saunders. M.D.  
Sinead Madigan  
James Monk

**Interested Parties**

Michael Lafond - Abbott Labs  
Miriam Cabrera – Quest Diagnostics  
Mandy Ungrihanon – Quest Diagnostics  
Sharon Dyer-Nelson, DHS-HCD  
Roy Pura – GlaxoSmithKline  
Sandra Benen – GlaxoSmithKline  
Kevin Lee – Reliant Pharmaceuticals  
Robin Scott, CDPH  
Citseko Staples – Harmony HMO  
Esther Sciammarella – CHHC  
George Hovanec-Consultant  
Gerri Clark – DSCC  
Marvin Hazelwood - Consultant  
Marsha Hurn - CBDC  
Joy Mahurin – CBDC  
Bob Robinson – Hemophilia Foundation of Illinois  
Kathy Bovid, Bristol-Myers, Squibb  
Dell Gist – Federal CMS

**Illinois Department of Healthcare and Family Services  
Medicaid Advisory Committee  
September 21, 2007**

**I. Call to Order**

Committee member, Bob Anselmo, chaired the meeting. He called the meeting to order at 10:05 a.m.

**II. Introductions**

Attendees in Chicago and Springfield introduced themselves.

**III. Review of the Minutes**

The March, May and July 2007 minutes were approved.

**IV. Administrator's Report**

James Parker, Deputy Administrator for Operations, provided the report.

- 1) The 2008 state budget was passed. The Governor has used his line item veto power to reduce the budget by \$463 million dollars. Legislators are scheduled to come back on October 2nd to deal with those cuts.

Mr. Parker advised that the payment schedule for physicians should remain timely at 30 days for services rendered to children and 60 days for services to adults.

- 2) The Governor remains committed to the Illinois Covered health plan. The department is looking at implementing some of the plan components and expanding some existing programs:

*Illinois Covered Assist* - This plan would allow access to care for low-income, uninsured adults. It establishes a medical home through a community health center and includes a prescription drug benefit and reimbursement for non-elective inpatient services.

*Illinois Covered Rebate* – This plan would help working families pay their health insurance premiums. Middle class families and individuals with employer-provided insurance will be eligible for help paying their health insurance premiums – 20% of their premium (up to \$1,000 per year). Illinoisans who choose Illinois Covered Choice (through an employer or on their own) will be eligible for *Illinois Covered Rebate* if their income is below 300% FPL.

*FamilyCare* program – this program now serves families up to 185% FPL – this program will be expanded to include families up to 400% FPL.

**Illinois Department of Healthcare and Family Services  
Medicaid Advisory Committee  
September 21, 2007**

*Health Benefits for Workers with Disabilities* program – this program that allows disabled Illinoisans to go back to work without losing their health benefits will be expanded from 200% to 350% of FPL.

*Expansion Of Coverage For Young Illinoisans* – This plan provides coverage for sick or injured kids 19-21 who are too old for *All Kids*. The Comprehensive Health Insurance Program (CHIP) will be expanded to provide a bridge for children with pre-existing conditions who have no access to insurance and become too old for *All Kids*. The department's tentative plan to notify potentially eligible individuals is to look at claims data that indicates an 18-year-old child may be eligible. These individuals would receive a notice advising of the need to contact CHIP (Illinois Comprehensive Health Insurance Plan) as CHIP has a 6-month period before the individual may be eligible.

*Illinois Breast And Cervical Cancer Program* – This program provides screening and treatment for all uninsured Illinoisans. On October 1st, the *Illinois Breast and Cervical Cancer Program* will expand to provide free mammograms, breast exams, pelvic exams and Pap tests for all uninsured women in Illinois. If diagnosed with breast or cervical cancer upon screening, participants will have access to coverage for treatment.

**V Old Business**

- 1) **All Kids and FamilyCare.** Enrollment statistics through July 31, 2007 were provided. Lynne Thomas, chief of the Bureau of *All Kids*, stated that about half of the applications are received via the web-based application.

Robyn Gabel asked about the requirement for clients to provide proof of citizenship and identity. She had heard that some of the local FCRC (Family Community Resource Center) offices were not accepting proof from the *All Kids* application agents (AKAA).

Ms. Thomas advised that the proof should be accepted at FCRCs and that we also appreciate the help of the AKAA's. There is no negative action for the client or AKAA if the birth certificate is not provided.

Sharon Dyer-Nelson, from DHS, stated that a memo was going out to local offices to clarify procedure.

There was discussion about extending local office hours to facilitate getting the needed proofs to casework staff.

- 2) **Primary Care Case Management (PCCM).** Mr. Parker reported on the *Illinois Health Connect* program. The department is in the final stages of the enrollment process. Everyone has now received the initial enrollment package and most persons

**Illinois Department of Healthcare and Family Services  
Medicaid Advisory Committee  
September 21, 2007**

have enrolled. Enrollment of participants in the South and Central regions is in process. A staggered mailing occurred over the last 3 weeks of August and first week of September. The second mailing regarding the mandatory enrollment is going out and by the first week of November, everyone will be assigned.

There should be adequate capacity. Only 2 or 3 counties are below capacity. They are smaller counties and there is excess capacity in the surrounding counties. The department is very pleased with capacity and the willingness of doctors to serve as PCPs (primary care providers).

Over 50% of participants required to choose have made a voluntary PCP choice. 70% was the target, but that number was not reached. Once auto-assigned to a PCP, we see people are now deciding. We expected this movement.

Persons may be assigned to an individual doctor or to a clinic. The assignments are to every provider that was willing to accept patients. This may be an individual doctor, RHC (rural health center) or FQHC (Federally Qualified Health Center). Of those clients that were auto-assigned, the great bulk went to a provider they are already going to. Persons are not assigned to a MCO (managed care organization) unless they were already voluntarily enrolled.

Some participants may have complained to legislators that they are unable to find a doctor. The department has spent a lot of time this spring and summer researching these issues and working with legislators. On the primary care side, we find most complaints are from before the PCCM rollout. It is like the past history of late payments to doctors. These are old complaints. However, for finding specialists, we continue to build the referral network.

Esther Sciammarella, of CHHC, stated that the Hispanic community has found some difficulty in finding Spanish-speaking providers and would be interested in seeing data on provider location.

Mr. Parker advised that we do track language preference in our database. We have tools to help patients find providers, however, we do not have language specific doctors in every geographic area. We can look at data on the location of Spanish speaking providers.

Bob Robinson, of the Hemophilia Foundation of Illinois, shared that the bleeding disorders community worked with Mr. Parker and his staff to find providers. He found that HFS staff did everything possible to assist. He also found that some consumers didn't understand the process. He stated that consumer education is a key function.

Jill Fraggos, representing committee member Susan Hayes Gordon, added that Children's Memorial hospital staff may view PCP assignments on their computer

**Illinois Department of Healthcare and Family Services**  
**Medicaid Advisory Committee**  
**September 21, 2007**

system. Staff found that parents didn't know the name of their child's PCP. She pointed out that patients do not focus on the PCP assignment letter but come to Children's by choice. They may not have been at the hospital in the last 3 years. She also noted the importance of consumer education.

Mr. Parker identified the situation occurring where a patient is at an FQHC site rather than going to their assigned PCP. HFS wants to collect data to find out why this happens.

- 3) Disease Management (DM).** Dr. Stephen Saunders, the Division of Medical Programs' Medical Advisor, provided the report. He stated that PCCM will be part of the program performance measures and that baselines are being developed. Many indicators will be similar to the HEDIS measure.

Dr. Saunders stated that *Your Healthcare Plus* is actively working with about 15,000 patients and nurses have contacted these patients. The program is working with long term care facilities and has nurse practitioners at 13 sites. This will eventually expanded to 25 institutions over the next month or 2.

Many patients have a behavioral health diagnosis. This includes about 25% with a disability and more than 50% of the long-term care population. Working under an interagency agreement with DHS and McKesson, patients may better locate and get services. This is a great benefit to patients.

The department is looking at medication usage and focusing specifically on psychotropic drugs. Some may be overused or misused. We are looking at the specific outcome of re-hospitalization. A Missouri study showed reduced hospitalizations for patients with better medication management.

Getting patient profiles to providers continues to be a priority. The department has sent patient profiles to 25 practices and plans to expand to 100 practices.

Mr. Anselmo, MAC member, referred to the baseline Hemoglobin HbA1C testing rate and asked if data will be more specific in the future.

Dr. Saunders advised that the department does not have a system to get more specific data. The provider can review specifics on a case-by-case basis. The department sends doctors statewide data, aggregate data for their practice and profiles for each of their patients.

There was discussion about looking at baseline data by geographic area. The data may be useful in planning outreach education for disease prevention. Dr. Saunders stated this was a good suggestion and the department will look at getting the data.

**Illinois Department of Healthcare and Family Services**  
**Medicaid Advisory Committee**  
**September 21, 2007**

- 4) **Medicare Part D.** Sinead Madigan, Chief of the Bureau of Pharmacy Services, provided the update on Medicare Part D and *Illinois Cares Rx*. She advised that the department would announce the Part D plans participating in *Illinois Cares Rx* on October 1st. The plan is to expand the number of choices. Participants have from November 15<sup>th</sup> through the end of the year to make elections.

At the last MAC meeting, the department reported 80,000 persons not enrolled. Now there are less than 50,000. We are reaching out through the Area Agencies on Aging via telephone and letters. We hope to reduce the number but still some will not enroll for various reasons.

- 5) **Veterans Care.** No report for this period.
- 6) **Access to Benefits and Services Task Force.** Nancy Crossman, of DHS, will attend meeting tomorrow and will report at the next meeting.

**VI. New Business**

- 1) Robyn Gabel, MAC member, had learned that there is a trial run of the ICARE registration for immunizations system. This is exciting as there is one registry for all children. She asked if there is a way that HFS and Automated Health Systems can work with the system. She asked if claims data goes directly to the Illinois Department of Public Health.

Dr. Saunders advised that if the immunizations are provided and billed correctly, the information would go to the registry. The provider must code for the correct antigen. It is an issue with the encounter rate clinics, as they are not required to report. The department is working on getting more detailed billing. Once the registry is up and running we can get details out to providers via professional newsletters and HFS provider representatives.

- 2) The State Children's Health Insurance Program (SCHIP) is scheduled to end on September 30th. Congress had passed a \$35 billion renewal appropriation, but the President is expected to veto the bill.

**VII. Subcommittee Reports**

- 1) **Long Term Care (LTC).** Bill Dart, with the Bureau of Long Term Care, provided the report. A number of topics were discussed.
- Beginning October 1, prior approval for non-emergency transportation is required for long-term care patients.

**Illinois Department of Healthcare and Family Services**  
**Medicaid Advisory Committee**  
**September 21, 2007**

- There are two new “Home and Community Based Services” waivers for developmentally disabled children covering in-home support and residential services.
  - The Comprehensive Coordinating Care plan program will increase access to services.
  - Flexible Senior Services has served 700 clients since its inception. Initially, funding was used to purchase assistive technology. Currently, home modifications and rent/utility assistance are the most frequent type of spending associated with the grant.
  - The Cash and Counseling demonstration program started on September 1.
  - The Supportive Living Facility program has been re-approved for another 5 years.
  - The “Money Follows the Person” demonstration project will be implemented to assist persons in moving from long-term care to a community setting.
- 2) **Dental Policy Review (DPR).** Dr. Richard Perry, MAC member, provided the report. The subcommittee met on July 18th. Currently, there are 3 community dental service grants with funding through 2008. These are in Jasper, Hancock and Vermillion counties.

In an effort to educate doctors, Doral Dental has distributed notepads to pediatricians with information about the availability of pediatric dental care. Dr Perry reported that the number of Illinois dental providers enrolled in the Medicaid program has dropped to 1,892 as of April 2007. Of about 9,000 dental providers in Illinois, less than 2,000 are enrolled. However, in the last 18-month period the number of claims has increased. He noted that in major metro areas the number of claims has remained constant.

Currently, there are only 68 orthodontists and 79 pediatric dentist enrolled. Dr Perry believes that there is an inadequate number of providers because the level of funding is inadequate. He stated that providers usually see insurance reimbursement rates of 65 to 70% of the amount billed. For the Medicaid program, reimbursement rates are about 20 to 25%. In states like Tennessee, where payments were increased, the provider participation rate increased to as high as 70%. He encouraged committee members and other participants to contact state legislators to lobby for increased funding.

The dental subcommittee meets next on November 7th.

- 3) **Pharmacy Subcommittee.** Mr. Anselmo, MAC member, reported that the subcommittee met on July 11th. The group discussed the tamper resistant prescription pad requirement. He advised that it has taken a full year to educate physicians. They have given away free pads and providers are still not using them. Mandatory use is scheduled to start October 1st. While the state won't deny claims if billing is for a prescription not on the tamper resistant pad, some patients will be denied services.

**Illinois Department of Healthcare and Family Services  
Medicaid Advisory Committee  
September 21, 2007**

Mr. Parker advised that absent some change and based on the law now, we will comply with the CMS requirements. The department has a fairly detailed Q & A section on our website. He stated that tamper resistant prescription pads are available.

HFS has issued provider notices and tried to contact various organizations. The department has contacted pharmacy companies and some drug representatives and they have agreed to help get out the message. We are working to the full extent possible to make this a workable policy. The department's web site tells pharmacies what to do if a prescription is received and it is not on a tamper resistant prescription pad.

**4) Public Education Subcommittee.** No report for this period.

Ms. Gabel asked for information on when this subcommittee will next meet and who staffs the subcommittee.

**VIII.** The meeting was adjourned at 11:18 a.m. The next MAC meeting is scheduled for November 16, 2007.

**Medicaid Advisory Committee**  
**September 21, 2007**  
**All Kids/FamilyCare Report**

**Enrollment**

- Enrollment data is attached. Enrollment data as of 07/31/07:
  - a. 1,297,643 All Kids Assist (Up to 133% of FPL)
  - b. 69,703 All Kids Rebate, Share, Premium Level 1 (133% to 200% of FPL)
  - c. 56,262 All Kids expansion children
  - d. 5,693 Moms and babies expansion (133% to 200% of FPL)
  - e. 366,648 Pre-expansion parents (up to approx. 35% of FPL)
  - f. 154,610 FamilyCare expansion parents

**Web-based application capability**

We implemented our web-based application statewide on August 11, 2005. Since then, we have received a total 103,440 web apps: 68,845 from the general public and 34,595 from AKAA's.
