September 1, 2014

Governor Pat Quinn
Members of the Illinois General Assembly

Greetings:

On behalf of the Illinois Department of Healthcare and Family Services (HFS), I present the following annual report on the Illinois Primary Care Case Management Program (Illinois Health Connect). This report is required by the *Covering ALL KIDS Health Insurance Act* [215 ILCS 170/47]. The Illinois Health Connect Program focuses on the promotion of the patient-physician relationship in order to improve the quality of healthcare for members, support continuity of care initiatives improve access to care, and to reduce unnecessary emergency room visits and hospitalizations through established medical homes.

The Primary Care Case Management program was the Department's first step toward implementing managed care throughout the state. Currently, Illinois is in the midst of increasing its healthcare delivery systems to ensure it is more patient-centered, with focus on improved health outcomes, enhanced patient access, and patient safety. These efforts include expanding the current healthcare delivery system to assist the state in meeting the Medicaid reform law under P.A. 96-1501 and the Affordable Care Act (ACA) initiatives.

To meet these goals, Illinois is expanding its managed care program to include Managed Care Health Plans: Coordinated Care Entities (CCEs), Accountable Care Entities (ACEs) and additional Managed Care Community Networks (MCCNs) and Managed Care Organizations (MCOs). Upwards of 1.5 million people on Medicaid and All Kids in five mandatory managed care regions, including those individuals currently enrolled in Illinois Health Connect, will be moved into some form of Care Coordination with a Managed Care Health Plan. This means that over the next several months, the majority of the clients currently enrolled in Illinois Health Connect will join Managed Care Health Plans for their care coordination services. Illinois Health Connect will continue to be a choice for clients in the non-mandatory managed care regions; however, it will no longer be a statewide Health Plan Choice for clients. Illinois Health Connect will also provide some program support for the CCEs and ACEs.

I look forward to continuing our Medicaid Program expansion efforts to assure that HFS Medical Program clients have access to the coordinated healthcare they need to stay healthy.

Sincerely,

Julie Hamos
Director

REPORTING REQUIREMENTS

SUMMARY

The *Covering ALL KIDS Health Insurance Act* was amended by PA 95-650 [215 ILCS 170/47] to require that HFS report annually to the General Assembly by September 1 of each year concerning the numbers of providers participating in the program.

215 ILCS 170-47

The Department shall report annually by September 1, on the following:

- (a) The number of professionals serving in the primary care case management program, by licensed profession and by county, and, for counties with a population of 100,000 or greater, by geo zip code. (See Appendix B, Table B.1)*
- (b) The number of non-primary care providers accepting referrals, by specialty designation, by licensed profession and by county, and, for counties with a population of 100,000 or greater, by geo zip code. (See Appendix B, Table B.2)*
- (c) The number of individuals enrolled in the Covering ALL KIDS Health Insurance Program by income or premium level and by county, and, for counties with a population of 100,000 or greater, by geo zip code. (See Appendix C)*

INTRODUCTION

The Primary Care Case Management program was implemented in 2007 and serves many All Kids enrolled children. This program also serves groups that are much broader, and includes adults. HFS's Primary Care Case Management program is designed to connect each eligible client with a Primary Care Provider at a "medical home" where regular ongoing care is received. Through a medical home, enrollees receive better coordinated care, decreasing inappropriate and costly care, such as emergency room visits or hospitalizations.

The Program Overview provides more information about the current Primary Care Case Management program and efforts that have been implemented to assist both HFS clients and providers navigate the program and build upon the medical home concept, including increasing access to care for individuals enrolled in the Covering ALL KIDS Health Insurance Program.

PROGRAM OVERVIEW

Illinois Health Connect

Illinois Health Connect is based on the American Academy of Pediatrics' initiative to create medical homes to encourage delivery of healthcare services in the most appropriate setting and ensure access to preventive healthcare services. A doctor's office or clinic is a more suitable setting than an emergency room for receipt of routine care. Clients who are enrolled in Illinois Health Connect have a medical home through a Primary Care Provider (PCP).

The goals of Illinois Health Connect are to:

- Improve access to quality medical care for HFS clients
- Make sure HFS clients have a "best-fit" medical home with a primary care provider
- Assure clients receive all necessary preventive and primary care, including immunizations and health screenings
- Increase access to care through the availability of a provider network and expansion of providers
- Reduce inappropriate Emergency Department (ED) visits and hospitalizations

Some populations, such as participants that have Medicare, are excluded from enrolling in Illinois Health Connect. Clients enrolled in Illinois Health Connect receive both care coordination and case management services from their PCP. Eligible clients that must select a PCP in Illinois Health Connect for their medical home include most children enrolled in All Kids, adults, and seniors and adults with disabilities. As of June 30, 2014, there were over 2 million HFS clients that had either chosen or been assigned to a PCP for their medical home. Of these, over 1.7 million clients are enrolled with a PCP in Illinois Health Connect for their medical home, while the remaining clients are enrolled with an MCO (See Table 2).

Table 2: Statewide Medical Home and Client Enrollment as of June 30, 2014

Number of IHC Medical Homes*	IHC Panel Size	Clients Enrolled with a PCP in IHC	Clients Enrolled with a PCP in MCO	Total Clients with a PCP in a Medical Home**
5,682	5,481,359	1,719,324	309,059	2,028,383

*FQHC/RHC/ERC Sites and Sites with more than one address are counted as 1 Medical Home and do not reflect the unique PCP counts provided in Appendix B, Table B.1.

** Medical Home count includes only clients enrolled in IHC or an MCO in VMC.

Although Illinois Health Connect no longer performs the initial client education and enrollment function, it does continue to operate a call center to assist both clients and providers. In FY14, the Illinois Health Connect call centers averaged over 53,000 calls a month. These calls covered a variety of issues including changing PCPs, health plan education, assistance with making appointments, assisting with coordinating access to specialty care for enrollees, responding to provider inquiries on program changes, both HFS and Illinois Health Connect programs, and assistance with Illinois Health Connect

quality tools that support the PCP's efforts in managing and coordinating care for each of their enrollees.

In addition, Illinois Health Connect has implemented many outreach and education strategies over the course of the program to help client's better understand the importance their medical home, working with their PCP, and the importance of health and wellness. An example of an Illinois Health Connect education strategy is the IHC Early Periodic Screening Diagnosis and Treatment (EPSDT) initiative, which is in response to the Federal EPSDT mandate for children enrolled in Medicaid. This initiative focuses on educating clients on the importance of EPSDT, encouraging clients to get well-child checkups for their children, and assisting clients in making appointments with their child's PCP for needed primary and preventive checkups and services, such as immunizations. During FY14, the EPSDT outreach initiatives resulted in over 1,270,000 Healthy Kids Notices mailed. In addition, Illinois Health Connect made almost 470,000 outreach and education calls to remind clients (both children and adults) that primary and preventive services may be due based on HFS claims data; and to assist the client in making an appointment with their PCP to receive the needed services.

Medical Homes

Physicians that participate as a medical home for clients are enrolled as an Illinois Health Connect PCP. Enrolled PCPs serve as a client's medical home and coordinate and manage the client's primary and preventive services, including well child visits, immunizations, screenings, and follow-up care as needed. The PCPs also issue referrals to specialists for additional care or tests as needed. Having a medical home and PCP ensures that clients have access to quality care from a provider that understands their unique health care needs and receives the advantages of care coordination and case management. Appendix B, Table B.1, provides the unique number of professionals enrolled as PCPs in medical homes as of June 30, 2014, by licensed profession, by county, and, for counties with a population of 100,000 or greater, by geo zip code.

As of June 30, 2014, Illinois Health Connect had enrolled 5,682 medical homes (See Table 2). The medical home total includes Federally Qualified Health Centers (FQHCs) and Rural Health Clinics (RHCs) enrolled sites. The enrolled medical homes provide a panel capacity of over 5.4 million patients, greatly exceeding capacity required for all eligible clients statewide. In most counties throughout Illinois, the medical home capacity for eligible clients is double the number of eligible clients in the county. This expansive network allows clients to have several choices of a medical home in most counties.

In order to assist enrolled PCPs in the management of their panels and to ensure PCPs have the most current information and tools for use in coordinating care for their patients, Illinois Health Connect offers an array of support services and educational opportunities for PCPs and their staff. These support services include a toll-free Provider Service Help Desk, dedicated Provider Services Representatives and Quality Assurance Nurses in the field, monthly Webinars and training opportunities on topics that impact providers' practices, and surveys to obtain provider feedback on the program and participation in quarterly Program Subcommittee meetings. Often the

educational opportunities are provided by Illinois Health Connect in conjunction with support from community-based organizations. During FY14, Illinois Health Connects' Provider Service Representatives and Quality Assurance Nurses in the field made over 1,000 visits to providers' offices each month to assist with billing/coding questions, program administration, EPSDT standards, quality improvements efforts and to provide MEDI training.

PCPs enrolled in Illinois Health Connect continue to receive reimbursement from HFS for their services using currently established fee-for-service rates. PCPs also receive a monthly care management fee. The monthly care management fee is paid for each client whose care the PCP is responsible for managing and coordinating. The fees are: \$2.00 per child (under age 21), \$3.00 per adult, and \$4.00 per senior or adult with disabilities. The care management fee is paid monthly, even if the client does not utilize a service that month.

Quality Tools

Illinois Health Connects' quality assurance program focuses on ongoing quality improvement and identifies and responds to opportunities for quality improvement in administrative practices and clinical functions. The quality assurance program includes strategies to assure access to care, evaluate provider and client education and monitor and report on care coordination and utilization management. The Department and Illinois Health Connect have worked with many provider and consumer groups, including the Quality Management Advisory Subcommittee, to develop quality indicators and monitoring strategies to ensure providers receive the support they need to effectively manage the care of their Illinois Health Connect clients and ensure that the clients are receiving quality healthcare services.

In order to assist PCPs in improving the quality of care for their clients, Illinois Health Connect has made available the following quality tools for use in their practices:

- **Panel Rosters** – Illinois Health Connect PCPs have access to an electronic panel roster through the Department's secure MEDI system. Panel rosters help providers manage their client's care by identifying clients that are due for screening or checkups based on HFS claims data.
- **Claims History Summaries** – Through the Department's secure MEDI system, physicians treating Medicaid clients can access HFS claims-based client health summaries that include client medication and immunization histories, previous lab orders, hospitalizations and other medical procedures. With the claims history of a client, a PCP is able to review the client's medical history, assist in assessing additional medical needs and determine compliance and on-going medical needs.
- **Provider Profiles** – Illinois Health Connect providers on a semi-annual basis (spring and fall) receive a profile report summarizing their individual performance on specified clinical indicators in addition to an aggregate summary of the performance of all PCPs participating in the Illinois Health Connect program. The

data reflected in the Provider Profiles is gathered from HFS claims data. Providers can obtain information regarding individual clients and whether they have received many of the clinical services reflected on the Provider Profiles by checking their Illinois Health Connect Panel Roster.

Bonus Program for High Performance

The IHC Bonus Program for High Performance encourages PCPs to provide primary and preventive services in accordance with established quality measurements to drive the adoption of quality improvement initiatives within their practices. Under the program, qualifying PCPs are eligible to receive annual bonus payments for each qualifying service under a bonus measurement. The bonus program payment is based on services provided for all clients enrolled on the PCP's panel on December 1 of the program year who have received one or more of the following services: Immunization Combo 3, Developmental Screenings, Asthma Management, Diabetes Management, Lead Screening or Breast Cancer Screening. For the calendar year 2013 IHC bonus Program, the HEDIS™ 50th percentile is the benchmark for the bonus measurements, with the exception of Developmental Screening, which is established by HFS.

The bonus payments for all measurement years for the program to date have been \$25 per qualifying client, per qualifying event. For Calendar Year 2013, IHC issued over \$4.6 million in bonus payments to over 4,800 PCPs. The bonus payment program has stimulated quality improvement initiatives within many PCP's practices, resulting in increased access to care and improved quality of care for enrolled clients.

Specialty Resource Database

Illinois Health Connect assists PCPs and enrollees in connecting with specialists for specialty care, through their Specialty Resource Database (SRD). The SRD provides specific information on the circumstances under which specialists are available to provide care to an eligible client. A specialist's registration in the SRD allows Illinois Health Connect to assist PCPs in directing clients to the most appropriate specialist provider. A breakdown of specialists by licensed type and specialty, by county and by geo zip code for counties with populations of 100,000 or greater is provided in Appendix B, Table B.2.

Illinois Health Connect Medical Home Edit Program

The implementation of the medical home edit program requires IHC patients to see their own IHC PCP, or a provider or clinic affiliated with their PCP. PCPs seeing IHC patients who are not enrolled on their panel, or on an affiliated PCP's panel, on the date of service, must obtain a referral from the patient's PCP in order to be reimbursed by HFS for services provided. PCPs are able to submit referrals for their patients to see other enrolled PCPs through the Illinois Health Connect Provider Portal via the secure HFS MEDI system, directly with Illinois Health Connect via fax, or by calling the Illinois Health Connect Provider Helpline. Specialists and non-IHC PCPs do not require a referral under this phase of the medical home edit program. During FY13, PCPs entered an average of 652 referrals per month.
