

A. Description

This is a legislatively mandated (PA098-0690, Sec. 6.3) provider-level report of blood lead screenings and results for children who received EPSDT/Well Child screenings within a given measurement (calendar) year.

Provides two percentages:

- Blood Lead Screening Percentage: The number of children given an EPSDT/Well Child visit by a provider (denominator) who were also given a blood lead screen (numerator), regardless of the provider who conducted the lead screen.
- Elevated Blood Lead Level Percentage: The number of children given a blood lead screen and who have a blood lead level result available using DPH data (denominator) having an elevated blood lead level (EBLL) (numerator).

This report will be scheduled to update data on a monthly basis; however, Calendar Year data will be posted annually in May.

B. Eligible Population

Enrollment	Medical/Full Benefit enrollment on the anchor date
Age	≤ 6 years of age on the anchor date
Anchor Date	Dec 31
Event Diagnosis	EPSDT screening (Table LDP-A) in the measurement year by a provider of the applicable provider types (Table LDP-B)
Provider Of Record	The provider of the EPSDT screening. A recipient receiving EPSDT screenings from multiple providers will be included in the data for more than one provider.

C. Blood Lead Screenings

Denominator	The Eligible Population
Numerator	The number with a blood lead screen in the measurement year (Table LDP-C). Lead screens are attributed to any provider of an EPSDT visit for the child regardless of the provider who performed the lead screen.

D. Blood Lead Results

Denominator	The Eligible Population given a blood lead screen and having an identified result in DPH blood lead data (these are the only ones for which results can be identified)
Numerator	The number with a confirmed EBLL identified from DPH lead table: Test Type = V and Test Result >= 10.

Claims: Include rejected claims; exclude voided claims.
