

Quality of Service (QoS)

Description:

The ICN offers IP Quality of Service (QoS) in order to allow constituents to use the ICN for delay sensitive applications such as IP video services.

Technical Overview:

A Quality of Service configuration has been implemented on the ICN network to minimize latency, classify constituent traffic at the access router, and police constituent traffic to ensure an equitable allocation of resources.

What's Included:

- QoS configuration on ICN managed access routers.
- Ongoing technical support for QoS configuration

What's Not Included:

- QoS configuration on non-ICN managed equipment

Cost:

QoS Service (*per site, per month*)

\$25.00

- The annual recurring cost will be waived for constituents who sign up for the IP Video Service.

Additional Information:

See the QoS section of the services web site www.illinois.net/services/qos.

How to Sign Up:

Contact your ICN Regional Technology Center: www.illinois.net/rtc
