

Domain Name System (DNS)

As a service to our constituents, the ICN provides DNS services at each of our network POP sites. To take advantage of this service, please use the DNS IP addresses assigned to the POP site to which you are connected. Computers with Internet access, such as workstations and proxy servers, must have DNS IP addresses properly configured within their TCP/IP settings. Specify the following addresses, in the order shown, within your computer's TCP/IP settings. If your organization maintains its own DNS, the address for your server should be the first entry in your settings and the appropriate ICN address could be used as a secondary.

If you have any questions regarding DNS, please contact your local Regional Technology Center for assistance.

RTC	MSA	City	DNS Server IP Address
1-4	01	Chicago	206.166.17.20 206.166.83.20
5	02	Rockford	206.166.37.20 206.166.33.20 206.166.41.20
5	03	Moline	206.166.33.20 206.166.37.20 206.166.41.20
5	04	DeKalb	206.166.41.20 206.166.37.20 206.166.33.20
7	05	Normal	206.166.45.20 206.166.49.21
6	06	Peoria	206.166.49.20 206.166.83.21
7	07	Champaign/ Urbana/ Paris	206.166.53.20 206.166.49.21
8	08	Charleston	206.166.57.20 206.166.75.21
