Tom,

We have received the spreadsheets and are reviewing them.

All,

Attached please find a spreadsheet showing: 1) the Annual Contract Quantities and Applicable Percentages under each of the long-term renewable agreements with each supplier; 2) the revised Annual Contract Quantities and Applicable Percentages for each agreement determined in accordance with March 2013 Load Forecast update that we submitted to you on March 15, 2013; and 3) the quantity and price for RECs that can be procured from each long-term renewable supplier with the available alternative compliance payment funds that ComEd has available as described in the IPA's Procurement Plan and in the Order of December 19, 2012 in Docket No. 12-0544 (pp. 111-5).

While neither the Procurement Plan nor the ICC Order require your written acceptance of the attached information, we would appreciate receiving such from you, or if you could at least let us know of any issues, concerns or questions that you have relating to the attached information. It is currently our intent to include the individual supplier information in the notice that we are contractually required to provide to each supplier.

We are revising the agreement used in the most recent REC procurement for use for purchase of these RECs. We should be able to have a copy of that draft to you by mid-week. If we able to get consensus on the agreement in time, we would propose to send it out with notice to the suppliers. Otherwise, we will simply note that we will provide the suppliers with a copy of the agreement once we reach a consensus with you.

If you have any questions or concerns, please let us know.

All,

Pursuant to the Commission's Order of December 19, 2012 in Docket No. 12-0544 (p. 110), attached please find the following documents:

- "Forecast March 2013 Update Tables.xlsx" – This is ComEd's March 2013 load forecast update. In addition, as provided for in the Illinois Power Agency's 2013 Electricity Procurement Plan (Final Plan, pp. 87-8), this document includes updated tables showing the overall amount of the necessary reductions in purchases under the long-term renewable contracts necessary to keep the purchase of renewables under the statutory cap, as well as a determination of the percentage amount that each long-term contract will need to be reduced.
- "Forecast Mar-13 Summary of Changes.doc" – This is a short memo describing the major changes since the November 2012 forecast update.
- "Forecast Mar 13 Muni Agg Community List (2).xlsx" – This is a list of the municipalities, counties and townships that have municipal aggregation referendums on the upcoming April 2013 general election ballot.
- "Forecast Mar 13 ProcurementBlocks2012 PY2013-PY2017 March 2013 Update (3).xlsx" – These are workpapers supporting the updated forecast.

These documents are also being distributed to all parties in the 12-0544 proceeding.

Please provide your written acceptance of this forecast and the curtailments. A response to this e-mail would be sufficient. Once we have that response, we will notify each supplier as to the amount that supplier's contract will be curtailed. The suppliers will have 30 days to notify ComEd as to their choice of one of 3 options specified in the contracts. The curtailments will take effect June 1, 2013.

If there are any questions you have or additional information that you would like, please let us know. We would appreciate your prompt attention to this matter so that we may meet the tight timeline outlined above.

Thank you.

Tom,

This is getting a bit ahead of the issue currently at hand, but I'm currently looking at some budgeting issues that go out a year.

Assuming this all moves forward and you spend the amount listed from Hourly ACPs, what will happen next year if this process continues as is with no significant changes? Do you have any rough sense of what the level of curtailment would be and what Hourly ACP balance would be?

We are trying to figure out some sense of what we might need to plan for in terms of use of the RERF to pick up the balance next year. I suspect you may not have enough data at this time to be able to give me an answer, but if you have any thoughts on this I'd really appreciate it.

Thanks.

-Anthony
