RE: Establishment of an Ambulatory Surgical Treatment Center

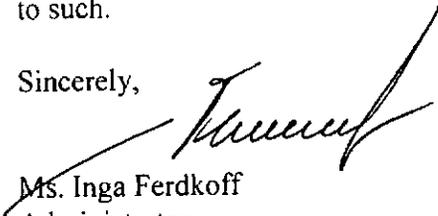

Dear Mr. Foley:

I regret to inform you that the Ambulatory SurgiCenter of Downers Grove is **OPPOSED** to development of a single specialty Ambulatory Surgical Treatment Center in Naperville, Illinois.

There are at least six other licensed ambulatory surgical treatment centers in the immediate area. These centers are not fully utilized and the addition of further services at your facility will have a direct, negative impact on available existing services.

Again, the Ambulatory SurgiCenter of Downers Grove cannot support an additional surgical treatment center in this area and we are adamantly **OPPOSED** to such.

Sincerely,

  
Ms. Inga Ferdkoff  
Administrator

Springfield, IL 62704

Dear Mr. Foley;

I regret to inform you that Oak Brook Surgical Centre is **opposed** to the establishment of a limited specialty ambulatory surgical treatment center by [REDACTED]

There is not a need in our HFPB planning area for any additional surgical services. There are a number of ambulatory surgical services currently available that are not operating at full capacity and the addition of another ambulatory surgical treatment center would impede the resources already available. Specifically, there is a fertility, obstetrics/gynecologic ambulatory surgical center in Downers Grove and also a state of the art center located at Suite 102, 2425 W. 22<sup>nd</sup>. St, Oak Brook, IL. that was recently renovated. The fertility, obstetrics/gynecologic center located in Suite 102 is near Dr. Morris' office and is strongly recommended. The introduction of additional fertility, obstetrics/gynecologic services to our geographic area would negatively impact services all ready offered by at least 20%.

Our facility does hereby **oppose** any plan by the Naperville Fertility Center and Randy Morris, M.D. to establish ambulatory surgical services in our geographic area as there are sufficient services to meet the needs of patients and physicians.

Sincerely,

  
Ali Nili  
Administrator
