Dear Ms. Avery:

I am writing this letter to support approval of the Certificate of Need for the construction of the Naperville Fertility Center, 11 North Washington Street (aka 11 West Benton Street and 15 North Washington Street), Naperville, IL 60540 by Randy Morris, M.D.

My wife and I strongly feel that the construction of a dedicated surgery and fertility center out in the Naperville area would be a real benefit and welcomed addition to the area. We have been blessed with two lovely daughters thanks to Dr. Morris, his staff and their incredible abilities. We researched various fertility doctors and facilities and chose Dr. Morris based on his reputation as being one of the best. Our two daughters are proof enough for us to this fact and we have referred him to a number of other couples in need of assistance.

While many of the visits were at the Naperville office, we also needed to make trips downtown on a number of occasions as part of this process. While it was definitely worth the inconvenience, the cost of parking and the time commitment to driving into the city was definitely not ideal. The drive was long and sitting in traffic after procedures was a challenge after an emotional experience like IVF can be. When we heard that Dr. Morris was applying to build a full service facility out in Naperville, we felt compelled to inform you of our support for his application. We hope you will consider this as you decide the final approval for his certificate.

If you have any questions for us regarding this letter, please feel free to contact us. We would be more than happy to express our support for this endeavor over a call.

Sincerely,

Joe and Shayla Giannetti

Dear Ms. Avery,

We are writing this letter to support approval of the Certificate of Need for the construction of the Naperville Fertility Center, 11 North Washington Street (aka 11 West Benton Street & 15 North Washington Street), Naperville, IL 60540 by Randy Morris, M.D.

We had a wonderful experience with Dr. Morris and his staff while undergoing all of our IVF related testing, monitoring and procedures. The biggest downside was the fact that we had to travel over 120 miles round trip on both the egg retrieval and embryo transfer dates. Had we been able to have these procedures done at a closer location, it would have saved us a considerable amount of time and stress during an already stressful time.

We hope you will consider and approve Dr. Morris' request to obtain a certificate of need for a dedicated, single specialty surgery and fertility center at the above mentioned location. Thank you for your time.

Sincerely,

Cynthia and Ben Webb

I am writing this letter to support the approval of the certificate of need for the construction of the Naperville Fertility Center, 11 North Washington Street, Naperville IL 60540 by Dr. Randy Morris.

My husband and I have been patients of Dr. Morris for about three years. We were so happy to have found him after several failed attempts with other fertility doctors. We travel a long way to see him and it would have been great to have a full service center in Naperville.

Dr. Morris and his staff are top notch and it would have been wonderful to have procedures done in a clinic that had his staff and administration. A full service clinic would really benefit the community and help out several of his current patients.

We have a beautiful daughter and a son on the way, thanks to Dr. Morris and his amazing staff. I have recommended him to several friends and I know they would benefit from a Naperville center.

We hope he gets a chance to help other couples in our situation who would be otherwise inconvenienced by the long drive to Chicago.

Thank you.

Dear Ms. Courtney Avery,

I am writing this letter in support of Dr. Randy Morris and his proposal for a single specialty surgery and fertility center. I currently practice general Obstetrics and Gynecology in the western suburbs and refer my patients with infertility and fertility related issues to Dr. Morris. He currently sees my patients in his office in Naperville, which is convenient for them, but if they need to have any egg retrieval or embryo transfer procedures done, they need to travel into Chicago and undergo these procedures. The patients are willing to be inconvenienced for this because his center has the highest pregnancy rate in the area, but they voice their desire for a center with results that are equal to this, but closer to home and more convenient. Facilities that are closer do not provide the same quality of laboratory and surgical suites needed to maintain these great outcomes. Also, facilities closer to home do not provide the flexibility with scheduling procedures that are needed, as obtaining pregnancy is not always able to be accomplished on a Monday to Friday schedule.

In conclusion, I am writing this letter to support approval of the Certificate of Need for the construction of the Naperville Fertility Center, 11 North Washington Street (aka 11 West Benton Street & 15 North Washington Street), Naperville, IL 60540 by Randy Morris, M.D.

Sincerely,

Dr. Lynn Fesenmyer

HEALTH FACILITIES &
SERVICES REVIEW BOARD

Ms Courtney Avery Administrator,

I am writing this letter to support approval of the Certificate of Need for the construction of the Naperville Fertility Center, 11 North Washington St, Naperville, IL 60540 by Randy Morris M.D. To have a facility by Dr Morris in Naperville would greatly benefit me and many others in the suburbs of Chicago. Dr Morris is an outstanding fertility doctor and the Naperville area would be so lucky as to have his practice have a home here. We choose to see Dr Morris because he is the top fertility Dr. I believe in the Midwest! I would highly recommend him and have done so already. When I began to research doctors in the area I found out a close friend and my cousin had went to him and both had successful pregnancies! So we went to him and got pregnant the 1st time! I then referred him to another friend, and they got pregnant the 1st time! His success rate is off the charts! We are currently going through our 2nd IVF cycle with hopes to be blessed with another beautiful baby. Our life has changed with this miracle that Dr Morris and his staff have given us. Please consider opening an IVF1 in Naperville, to allow others a chance for a miracle that we were given! Thank you for taking the time to read this!

Sincerely,

Tracy Mueller

(Happiest mother in the world!)

HEALTH FACILITIES &
SERVICES REVIEW BOARD

Dear Ms. Courtney Avery,

I am writing this letter to urge approval of the Certificate of Need for the construction of the Naperville Fertility Center, 11 North Washington Street (aka 11 West Benton Street and 15 North Washington Street), Naperville, Illinois 60540 by Randy Morris, M.D.

My husband and I sought Dr Morris' help in 2009. After 3 failed IVF attempts at our previous doctor, I was very nervous and hesitant to begin the journey again. I had only one more insurance-funded attempt at IVF, and I was very scared that the same medical errors and lack of compassion that I had experienced before would happen again. I was completely wrong. Dr Morris and his staff were WONDERFUL! I was supported every step of the way and I was reassured that there was still hope. In May of 2010, my husband and I welcomed two beautiful and healthy boys into our lives. We will forever be grateful to them. The only issue I had with the whole procedure was our travel to Chicago. There was so much traffic and the trip took a long time. I worried quite a lot that the traffic would make us late for our procedures. We were on time, but that was stress that we would not have had, if there was a facility closer to our home.

Dealing with infertility is very difficult on the individual and the couple. Dr Morris and his staff went above and beyond in helping us through this stressful time. I know that if there is a facility out in Naperville, they will be able to help many more patients like us. Please approve the Certificate of Need for the Naperville Fertility Center.

Sincerely,

Jennifer and Brian Belluomini
