RE: Project Completion for Dialysis Projects

Dear Mr. Moon:

We have received correspondence from you dated February 27, 2013 that references a conference with the State Board Staff regarding the date a dialysis project is complete. The information I gave you was not correct. For all dialysis projects the completion date is the date the facility is certified and not the date the first patient is treated.

We have determined Project #12-026 complete and there is no further action required on your part for Project #12-026.

Please note this change for all future dialysis projects.

Sincerely,

Mike Constantino
