Re: RCG Pekin, Project # 12-069

Dear Mr. Constantino:

Per your conversation with Ms. Ranalli today, we would like to modify our application as referenced above to relocate only the existing stations at our Pekin Hospital facility, without adding two (2) additional stations. When we initially planned for the facility, the DaVita Tazewell project had not been approved and we determined the additional two stations were necessary given the Fresenius Pekin facility's high utilization. At this point, it is appropriate to simply relocate existing stations and add stations as and if necessary at a later date.

We understand this is a Type B modification, which will not result in the application being moved from the February agenda, which is important as the lease at the Hospital location our current clinic operates at in Pekin will expire in 2014.

Regarding the size of the clinic, we will use the space for home training. The relocation site is an existing building, and we are working within the footprint of the leasable space regarding facility size.

I appreciate your consideration and assistance.

Sincerely,

Lori Wright
Senior CON Specialist
