RE: Notice of Obligation
CON Permit No. 12-076
IDPH No. 9870

Dear HFSRB:

Please be advised that our above referenced project received a Certificate of Need Permit (Project No. 12-076) from the Board on December 10, 2012 and, as of August 22, 2013, has been obligated.

We submitted project plans to the Design and Construction Section of IDPH for architectural design review and, on August 12, 2013, received notice that our plans comply with the ASTC Licensing Requirements and the Life Safety Code (IDPH No. 9870). We have attached a copy of Mr. Bender's letter.

In accordance with 77 IL Adm. Code, Section 1130.710, regarding Validation of Permits and your revised February 4, 2013 Permit Approval letter, we have until June 10, 2014 to obligate our project and until December 31, 2014 to complete our project. We are meeting our validity of permit requirements.

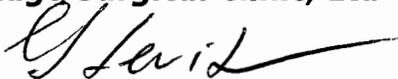

Please be advised that, in accordance with 77 IL Adm. Code, Section 1130.720 regarding Obligation, we have obligated the project as of August 22, 2013 and retained The Stonefield Group of Palatine, IL to construct the project for us. There are no changes in the size, scope or amount of the project or in the project costs and the source of funds from that which was approved in our December 10, 2012 Permit.

The project is proceeding with due diligence and will be completed no later than the completion date approved by the HFSRB. We will provide the HFSRB with information including an annual progress report and to meet all other requirements under Section 1130.710 to maintain the validity of our permit.

Please acknowledge receipt and approval of this Notice of Obligation.

Sincerely,

Chicago Surgical Clinic, Ltd

Dr. Yelena Levitin, M.D.

Re: Chicago Surgical Clinic Ltd
Arlington Heights
New ASTC
IDPH No: 9870

Dear Robert W. Kirk, AIA:

We are in receipt of your letter dated July 20, 2013 with your item by item replies to our architectural review comments for the above captioned project dated July 17, 2013. We have reviewed your replies for the purpose of determining compliance with the Ambulatory Surgical Treatment Licensing Requirements and the 2000 Edition (for certification and for licensure) of the Life Safety Code. We have no further architectural comments.

Even though the Illinois Department of Public Health (Department) conducts a facility plan review, the facility is totally responsible for meeting the Department's licensure standards. The facility's responsibility is never waived even if the Department conducts a facility plan review and does not specify all licensure deficiencies.

If you have any questions, please do not hesitate to call us at 217/785-4264. The Department's TTY # is 800/547-0466, for use by the hearing impaired.

Sincerely,

William R. Bender, Staff Architect
Design and Construction Section
Division of Life Safety and Construction
