Dear Sirs,

When it comes to emergency medical care you can't be too close to a first rate hospital facility. As a 14 year resident of Frankfort Township my family supports an urgent care facility in Frankfort proper. I myself have had heart problems in the recent past and would welcome the peace of mind that would come with an urgent medical facility just two or three minutes away.

As for your choice of operators, all I can say is that working in Bourbonnais for the past 30 years as news director for WVLI radio I have always found Riverside Medical Center to be a first rate medical facility with a top notch management team, doctors and support personnel. Riverside is constantly striving to make healthcare more convenient to young and old alike by reaching out with satellite facilities throughout the area like the one planned for Frankfort.

An emergency healthcare center would be a great addition to Frankfort and partnering with Riverside would be an outstanding choice. In closing, believe me when I say I'd trust my life with Riverside.

Ken Zyer
