April 25, 2015

Illinois Health Facilities and Services Review Board
525 West Jefferson St (2nd Floor)
Springfield, Illinois 62761

I am writing to express my strong opposition to the establishment of a second dialysis center in Danville, Illinois. I have been a member of the Danville community and a practicing physician here for over 33 years. Dr. Sodhi and Danville Dialysis Services have always provided high quality and easily accessible services to all my patients.

Danville Dialysis Services is a modern, well run facility with an excellent staff who are well trained professionals, who are caring, kind and sympathetic. They are members of our community and have a vested interest in our community. The center is not running at full capacity and I feel it should be utilized to its capacity before any consideration is given to a second facility.

A second dialysis center will certainly and directly cause financial havoc in our present facility and likely result in its closure in the near future. There is no need for a second dialysis center in Danville and I strongly urge the Board to deny the permission to build a second center in Danville, Illinois.

Respectfully,

Joseph M. Fabrizio, M.D.
