

Notice to Patients about the Illinois Health Information Exchange's EHR Connect

We participate in the Illinois Health Information Exchange's (ILHIE) EHR Connect, a statewide electronic network for sharing a summary of your health information between health insurance plans and health care providers including physicians, hospitals, pharmacies and laboratories. Better information sharing may improve the quality of your health care and assist with treatment, payment and health care operations. Your health information may only be accessed by authorized ILHIE EHR Connect users for authorized purposes. Certain specially protected health information will not be shared through the ILHIE's EHR Connect without your permission.

If you do not want your health information to be shared by us through the ILHIE's EHR Connect, you can elect to opt-out of the ILHIE's EHR Connect by completing the "ILHIE's EHR Connect Opt-Out Form." For more information and to access an Opt-Out Form, ask in this office or visit [direct link to form].

For more information about the ILHIE's EHR Connect, visit www.ilhie.org.
