

Public Notice

**Illinois Power Agency
Purchase of Renewable Energy Credits**

June 14, 2013

In the 2013 Procurement Plan of the Illinois Power Agency (“IPA”), the IPA announced its intent to use a portion of the funds collected from Alternative Retail Electric Suppliers and deposited into the Renewable Energy Resources Fund for the purchases of Renewable Energy Credits (“RECs”) that would result from the curtailment of Long-Term Power Purchase Agreements (“LTPPAs”) procured for Commonwealth Edison (“ComEd”) and Ameren Illinois (“Ameren”) in 2010. The curtailments would be the result of the budgets for Renewable Portfolio Standard compliance reaching their legislatively mandated rate cap.

In March of 2013, ComEd informed the IPA that it would be curtailing its LTPPAs for the 2013/14 delivery year. (Ameren determined no curtailment would be needed.) The IPA subsequently held a workshop for interested stakeholders on April 3, 2013 and invited comments from interested parties on the purchase of the curtailed RECs.

As a result of this process seven suppliers have entered into contracts to sell RECs to the IPA for the 2013/2014 delivery year. The suppliers that successfully elected to participate are:

FPL Energy Illinois, LLC. DeKalb, Illinois
Blackstone Wind Farm, LLC. McLean, Illinois
Meadow Lake Wind Farm, LLC. White, Indiana
Meadow Lake Wind Farm II, LLC. White, Indiana
Grand Ridge Energy IV, LLC. LaSalle, Illinois
Invenergy Illinois Solar, LLC. LaSalle, Illinois
Shady Oaks Wind Farm, LLC. Lee, Illinois

A maximum of 121,620 MWh of RECs will be purchased during the 2013/14 delivery year at an average REC price of \$18.42.
