

# Orthodontia Services, Limitations and Dental Schedule of Benefits

FY2007 & FY2008

## Orthodontic Services

The lifetime maximum benefit for child orthodontics is \$1,500. The benefit is based on the length of treatment. This lifetime maximum applies to each plan participant regardless of the number of courses of treatment.

## Orthodontic Limitations

- The course of treatment (initial banding) must begin before age 19.
- The \$100 plan year deductible will apply to the orthodontic benefit if it is the initial claim processed in a plan year except for preventive or diagnostic procedures.
- For covered orthodontic services contact the CompBenefits.

**Reimbursement of Benefit:** 25% of the applicable maximum benefit, based on the length of treatment, is reimbursed after the initial banding. The remaining benefit is prorated over the remaining length of treatment.

Length of Treatment	Maximum Benefit
0 – 36 months	\$1500
0 – 18 months	\$1364
0 – 12 months	\$ 780
