

# Orthodontic Schedule of Benefits

(July 1, 2008 through June 30, 2009)

## Orthodontic Services

The lifetime maximum benefit for child orthodontics is \$1,500. The benefit is based on the length of treatment. This lifetime maximum applies to each plan participant regardless of the number of courses of treatment.

An annual plan deductible will be applied to the orthodontic benefit if it is the first dental claim processed in the plan year. The deductible for services incurred from July 1, 2008, through December 31, 2008, is \$100; the deductible for services incurred on or after January 1, 2009, will be \$125. The plan year deductible does not apply to preventive or diagnostic procedures.

## Orthodontic Limitations

- The course of treatment (initial banding) must begin before age 19.
- For covered orthodontic services contact the CompBenefits.

**Reimbursement of Benefit:** 25% of the applicable maximum benefit, based on the length of treatment, is reimbursed after the initial banding. The remaining benefit is prorated over the remaining length of treatment.

Length of Treatment	Maximum Benefit
0 – 36 months	\$1500
0 – 18 months	\$1364
0 – 12 months	\$ 780
